# Arizona Government University (AzGU): Payment Gateway

## A portal to greater efficiency

## Greater convenience needed... with security

Like many other Arizona government agencies, the Arizona Government University wanted and needed to allow for greater use of payment methods other than personal checks or money orders. And it had to do so while safeguarding the data of its clients and its own resources.

## Finding a solution that worked... and fit

Since it didn't seem justified or make sense for the Arizona Government University to strike out on its own to find or acquire a solution, the group worked with GITA and the Arizona Portal team to determine if any existing solutions would work. Their investigation indicated that indeed, Payment Gateway could be the answer they needed.

**The results**

The application of Payment Gateway to the Arizona Government University is providing greater convenience to clients and greater operating efficiencies and audit trails within its own processes. It is proving to be both an efficient and effective solution.

**Some additional details**

For AzGU, Payment Gateway has provided an increased measure of institutional efficiency; much greater convenience and improved service for clients; effective use of institution resources; and consistency with other state organizations.

**Customer Survey comments**

*“Wonderful.”*

*“Love it.”*

*“No problems. Worked well.”*
